SUMMARY

Motivated Computer Science undergraduate with experience in **AI/ML**, full-stack development, and mobile app design. Skilled in **Python (FastAPI)**, **React**, **Swift**, and **LLM**-based chatbot development, with hands-on work in computer vision using **OpenCV** and **YOLO**. Interested in secure API design, **Generative AI**, and building scalable real-world applications.

EDUCATION

SRM Institute of Science and Technology, Kattankulathur Aug 2023 – Present
B.Tech in Computer Science Engineering (AI-ML) *CGPA: 8.0*

Jayshree Periwal High School, Jaipur 2023
Higher Secondary (Class XII) *Completed*

EXPERIENCE

NPCIL (Govt. of India Enterprise under BARC) Mumbai, India
AI Intern *Jun 2025*

- Developed an offline **AI-based PDF chatbot** using **Python**, **BERT**, **pdfplumber**, and **PyPDF2** for secure, air-gapped environments.
- Built an interactive web interface using **HTML**, **CSS**, and **JavaScript**, enabling responsive and efficient document querying.
- Optimized **retrieval** and **embedding** workflows to enhance accuracy and reduce latency while adhering to strict security protocols.

SRM Institute of Science and Technology Kattankulathur, India
Full Stack Developer and AI Intern *Aug 2025 – Nov 2025*

- Developed a full-stack **Placement Analytics Dashboard** to streamline recruitment insights for institutional stakeholders, and deployed **RESTful APIs** ensuring seamless communication between backend services, AI modules, and the client interface.
- Built a secure **FastAPI backend** with **JWT authentication** and role-based access control for protected data access.
- Integrated a **RAG**-powered AI chatbot using **LangGraph** and **LLMs**, and engineered a responsive **React.js frontend** with data visualizations generated from **MongoDB** using **Pandas**.

PROJECTS

LearnAble 2025
Tech Stack: Swift, SwiftUI, AVFoundation, Speech Framework

- * Developed an accessible learning app featuring voice-based interaction using **AVFoundation** and **Speech Framework**.
- * Implemented real-time **braille conversion** and customizable accessibility settings.
- * Created interactive education modules supporting inclusive learning for visually-impaired users.

AI-Doctor 2025
Tech Stack: Python, FastAPI, Gradio, Grok AI API, Docker

- * Developed an AI-powered medical assistant that analyzes symptoms using **Grok AI** for health insights.
- * Built a modular **FastAPI backend** with an interactive **Gradio UI** for real-time diagnosis workflow.
- * Containerized the system with **Docker** ensuring scalable deployment and consistent performance.

Helmet Detection System 2024
Tech Stack: Python, OpenCV, YOLO, Computer Vision

- * Built a real-time helmet detection system using **OpenCV** and **YOLO** to identify riders violating safety rules.
- * Optimized detection and tracking pipelines for fast inference on CCTV and low-resource environments.

TECHNICAL SKILLS

Languages: Python, C/C++, Swift, JavaScript, HTML, CSS

Frameworks & Libraries: FastAPI, Flask, Gradio, React.js, Node.js, Express.js, Django, Streamlit, Docker

Data Science & ML: Pandas, NumPy, sklearn, BERT, LLMs, RAG Systems, LangGraph

Computer Vision: OpenCV, YOLO

Databases: MongoDB, MySQL, ElasticSearch

CERTIFICATIONS

C++ Programming – Udemy (2023)

C Programming – Udemy (2023)

Programming in Java – NPTEL

Oracle Cloud Infrastructure-Certified Generative AI (Oct 2025)

AWS Certified Machine Learning Engineer - Associate (April 2026)
